

My Week in Toddler Class

Child Name: Xxxxx

Teacher Name: Rebecca Maisey

This week I explored and played in toddler class by doing these things:

<p>Date: 6-26-18</p> <p>Today Xxxxx took turns going down the slide in the classroom. In the gross motor area, she pushed blocks across the floor and reached inside them to try and grab plastic balls from inside. In the fine motor area, she ran her hands through salt in a bin and told Xxxxx to hold out her hand so she could put salt in it. During large group, Xxxxx had the opportunity to choose an activity by picking 1 of the 3 available props. She chose "Freeze Dance." Outside, Xxxxx took turns with the other children going down the slide.</p>	<p>Date: 6-28-18</p> <p>Today Xxxxx used a paintbrush to draw in salt. She also ran her fingers through salt, picked it up and let it run through her fingers, and poured salt into my hands. We took turns putting salt in each other's hands. In the flop in drop area, Xxxxx and I looked at the class book. She pointed to Xxxxx's picture and turned to see where she was in the classroom. She looked through the book asking "where's Xxxxx?" Later, she put sunglasses on me after putting some on herself. After large group, she sat in a rocking chair while wearing purple sunglasses. Outside Xxxxx went down the slide several times and used colored ice cubes to draw on her hands and paper.</p>
--	---

My Goal:

xxxxx will be able to recognize and name the colors red, yellow, blue, green, and orange once each day in lab.

I worked on my goal today by:

<p>Date: 6-26-18</p> <p>1 Today Xxxxx worked on her goal when she correctly said there were blue and pink balls in a block in the gross motor area after Xxxxx said she couldn't see what color they were.</p> <p>2. Xxxxx worked on her goal in the dramatic play area when she said a carrot was yellow, but pointed to an orange indicating they were the same color.</p>	<p>Date: 6-28-18</p> <p>1. Today Xxxxx worked on her goal as she correctly called two pairs of sunglasses white when I asked her.</p> <p>2. Xxxxx also worked on her goal as she correctly named blue and purple balls inside of blocks in the gross motor area. She said "ow" when asked what color a yellow ball was.</p>

Comments (i.e. toileting, accidents and/or health concerns): None

My Week in Toddler Class

Child Name: Xxxxx XXXXX

Teacher Name: Rebecca Maisey

This week I explored and played in toddler class by doing these things:

<p>Date: 6-26-18</p> <p>Today Xxxxx rolled cars on top of a shelf next to Adam in the block area. At the sensory bin, he gave a car to Grayson when a teacher pointed out that he didn't have one. At the fine motor table, Xxxxx used paintbrushes to draw in bin filled with salt. During large group, he bounced monkeys on the floor and on a bed during <i>Five Little Monkeys</i> and shook bells to <i>Shake Your Sillies Out</i>. Outside, Xxxxx looked through the gate with Adam and waved at the people going by. He also went down the slide several times.</p>	<p>Date: 6-28-18</p> <p>Today Xxxxx smiled and laughed as he looked through the railing on the play structure at me and Gabby. Later when both he and Gabby were on it, he tried to hit Gabby's back, but I used my arm to block him and explained that we don't hit our friends because it hurts them and makes them sad. At the sensory bin, Xxxxx helped a teacher clean up pieces of tire tread that had been thrown out of the bin. While playing with Morgann, Xxxxx patted/brushed Morgann's belly with his hand. He and Morgann took turns patting/brushing each other's bellies. During large group, Xxxxx had the opportunity to choose an activity by picking 1 of the 2 available props. He chose <i>Five Little Monkeys</i>. Outside, Xxxxx ran across the grass and played peek-a-boo through the window on the slide structure.</p>
---	--

My Goal:

Xxxxx will be able to take turns using toys with other children two times each day in lab. He won't take toys away from the other children.

I worked on my goal today by:

<p>Date: 6-26-18</p> <p>1. Today Xxxxx worked on his goal as he took turns with Morgann looking through a window on a play structure outside.</p> <p>2. At the ball drop, he was the only one without a ball. He waited patiently and didn't try to take balls from other children.</p>	<p>Date: 6-28-18</p> <p>1. Today Xxxxx worked on his goal when he looked at the cars Adam was playing with, but when a teacher intervened and said there were more cars in the sensory bin, he went over and started playing with them.</p> <p>2. Outside Xxxxx spontaneously took turns going down the slide.</p>
